Summary

Ambitious Information Science & Telecommunication student with hands-on experience across full-stack web development (MERN) and Artificial Intelligence / Machine Learning, including building GenAI applications with LangChain and Python. Recognized as a top-performing intern (96th percentile) at AediaX Tech Private Limited. Quick learner and capable of working independently & as a team member.

Education

Gangadhar Meher University <i>B.Sc. in Information Science and Telecommunication (Minor: Statistics)</i>	Sambalpur, Odisha 2024 – 2027
Guru Nanak Public School <i>CBSE, Science (PCMB) – 80.8%</i>	Sambalpur, Odisha 2021 – 2023
Guru Nanak Public School <i>Board of Secondary Education (Matriculation) – 88.17%</i>	Sambalpur, Odisha 2021

Relevant Coursework

Data Structures & Algorithms • DBMS • Computer Networks • Operating Systems • OOPs • Statistics (Minor)

Experience

Full Stack Intern <i>AediaX Tech Private Limited</i>	Bhubaneswar, Odisha May 2026 – Present
- Completed an intensive 1-month (120-hour) Full Stack Web Development training and on-site internship, building applications with the MERN stack (React.js, Node.js, Express.js) and PostgreSQL/MongoDB - Achieved an Internship Score in the 96th percentile, reflecting strong technical skills, consistency, and a positive learning attitude - Awarded the 1st Place / Top Performer trophy and the Certificate of Innovation Excellence for outstanding performance, innovation, and problem-solving	

Projects

Agentic LLM Chatbot System <i>Python, LangChain, LangGraph, LangSmith, Groq API</i>	2025 – Present
- Built a conversational AI chatbot with 3 progressive architectures — from a basic chatbot to a fully autonomous agent with tool-routing logic that decides when to search the web, run calculations, or call custom functions, improving response accuracy - Implemented a human-in-the-loop mechanism allowing the AI to pause, request input, and resume — enabling supervised operation in sensitive workflows - Built a multi-agent pipeline with specialized Researcher and Writer roles, with end-to-end monitoring via LangSmith	

Technical Skills

Languages: Python, Java, SQL, JavaScript (ES6+)
Web Development: React.js, Node.js, Express.js, HTML5, CSS3, RESTful APIs
Databases: PostgreSQL, MongoDB, MySQL
Frameworks & Libraries: FastAPI, NumPy, Pandas
DevOps & Tools: Git, GitHub, Jupyter Notebook, Docker
AI/ML: LangChain, LangGraph, LangSmith, LLMs, RAG, pgvector, Machine Learning (Basic)

Certifications

Python for Data Science – IBM | [Credly Badge](#)
Python 101 for Data Science – Cognitive Class | [View Certificate](#)
AWS Solutions Architect Job Simulation – Forage | [View Certificate](#)
